Billing Mammography Claims Electronically

When mammography claims are billed electronically the Mammography Certification Number is required.

Mammography Certification Number

The Mammography Certification Number is assigned to a provider certified to perform a mammography and is required on all mammography claims.

Implementation Guide Specifics:

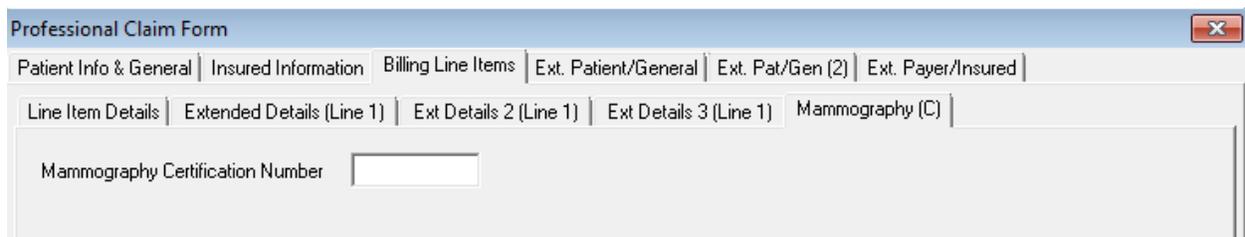

Example: REF*EW*111111

- The Mammography Certification Number is required on Medicare claims for all mammography services.
- The Mammography Certification Number is submitted in Loop 2300 (Claim Information) and Loop 2400 (Service Line Information).
- The Mammography Certification Number is submitted in a REF segment.
- The Reference Identification Qualifier must be submitted as EW.

Entering a Mammography Certification Number Using PC-ACE Pro32

There is one field in PC-ACE Pro32 required for a mammography claim; the Mammography Certification Number field.

Note: The Mammography tab will appear when a valid mammography procedure code is entered in the Billing Line Items tab.

The screenshot shows a software window titled "Professional Claim Form" with a standard Windows-style title bar (minimize, maximize, close buttons). The window contains several tabs: "Patient Info & General", "Insured Information", "Billing Line Items", "Ext. Patient/General", "Ext. Pat/Gen (2)", and "Ext. Payer/Insured". The "Billing Line Items" tab is active, and within it, the "Mammography (C)" sub-tab is selected. This sub-tab contains a single text input field labeled "Mammography Certification Number".

Note: PC-ACE Pro32 requires the minimum length of the Mammography Certification Number to be six characters in length.
